*The complete range for distributors, craftsmen and industry*

## BeA Tools and Fasteners – The complete range of fastening solutions for industry

The company Joh. Friedrich Behrens AG (BeA) was founded in 1910. In more than 100 years of its existence, it has developed into a global group with a total turnover of over 120 million euros, achieving market leadership throughout Europe in the fastening technology field.

The BeA trademark stands for top of the range products in the fastening technology field. BeA compressed air nail guns and fasteners are characterised by top quality and reliability. In order to maintain these high standards in the future, we are constantly optimising and expanding our product range. By using innovative technologies, BeA sets the standards in fastening technology.

BeA tools and fasteners are easy to use and perform with excellent results. They speed up your manufacturing process and are more economical. Our tools are tested in various tough environments.

BeA is a member of the following associations:

BeA International

Staplers and nailers carrying the BeA logo are used around the world. On building sites in Moscow as well as craftsmen in New York, automotive suppliers in Germany and packaging lines in Melbourne. Around the globe no other supplier distributes more self loading nailers and staplers for the automated industrial production. In Europe, USA, Australia and South America BeA is the market leader in fastening technology for furniture production.

Our employees at the Ahrensburg head quarters and in our 16 regional companies support our customers around the world by supplying BeA products and services for the highest demands. In more than 50 other countries BeA is represented by authorized agencies and partners, who distribute the quality products from Ahrensburg / Germany.

Our international network of fastening specialists can prepare a cost effective package of product, service and pricing that will exceed your expectations. To locate your nearest distributor please contact our international sales department at [info@bea-group.com](mailto:info@bea-group.com)

The BeA group is involved in national and international committees in the creation of the European norms and develops them constantly according to new demands.

BeA products are certified and stand for reliability, quality and safety.

# BeA – the strong partner in the

## More power and even more products

**BeA «Pusher»**  
for Nails 0° TCIN

### BeA Autotec - New Tools

**BeA 246/284 SL**  
for Staples 246  
(100 - 160 mm)

**BeA 346/284 SL**  
for Staples 346 (160 - 200 mm)

(further information on page 15, 113)

### Autotec strip nailer type 296 with reloading nail type 297

Reloading of the nails into the magazine happens automatically utilizing a cassette type holding bay. This cassette has a capacity of 90 strips (equals approx. 1.800 nails). For a quick change from one nail length to a different nail length additional cassettes are available which can be preloaded whilst not in use. Filling of the nail cassette (straight out of the carton) is possible in no time. The loading station automatically senses the position of the nail head and feeds it correctly into the magazine of the nailer. (further information on page 110)

#### Applications

Crating, heavy duty wooden packaging (pallets etc.) and prefabricated housing industry

## Skater for heavy duty staples

### Skater 14/65-830 C and Skater 180/65-835 C

The BeA skaters are ideal for stapling down gypsum boards, wooden boards (OSB, MDF, etc.). Stapler options for the skater are models 14/65-830C and 180/65-835C. Both the front and the rear handle come with actuation triggers which allow stapling of boards up to 3 meters with two operators. Additional features are a dry firing control, a quick release for staples and a rotatable air exhaust. Both skater models achieve fast and precise stapling according to Eurocode 5. (further information on page 41, 42 and 114)

## Skater for coil nails

### Skater 800 DC

In addition to the above skaters BeA also developed a skater using the robust coil nailer type 800 DC for Wire collated nails. The Skater 800 DC is used for wooden crates and in the prefab housing industry. (further information on page 41, 42 and 114)

# and reliable fastening industry

Highest Quality + ideal solutions

### Pneumatic nailer with two hand system BeA 570 DC and 102 DC

BeA has developed a nailer with a two handed system, in order to match the new security stipulations. The new double handed actuation system makes sure that the worker permanently has his two hands on the tool (please see pages 59 & 68 for more information).

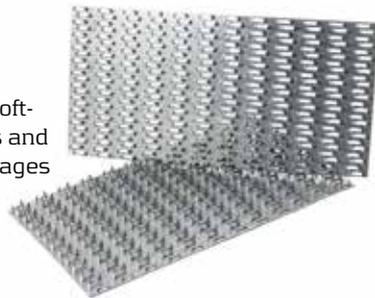

### Cordless wide crown staplers 246/100-670E

The already wide range of cordless tools has been enlarged with another tool. The BeA 246/100-670E is the first of its kind in the world firing staple type 246 (65 - 100 mm length). This extra light tool was developed for the use on the building sites, e.g.: for stapling on insulation materials (please see page 24 for more information).

### BeA nailplates

BeA nailplates and calculation software for the industrial roof truss and other wooden framework (see pages 12 and 13).

### Cordless metal roofing nailer R35-654E

The new cordless tool for sheet metal clips is well balanced and light. This nailer uses plastic collated strip nails from 22 - 35mm. It is an essential and flexible tool for nailing down connectors on various types of metal roofs (please see page 24 for more information).

### Saber saw blades

BeA Recipro saber saw blades are specifically used by pallet repair shops and for wooden packages. These long lasting saber blades easily saw through timber and/or steel. BeA saber saw blades fit into all common saws (further information on page 6 and 7).

Many different applications – ideal solutions – one supplier  
GET SUPPLIED FROM ONE SOURCE

- High quality standard
- Certified products
- Warehousing and fast delivery times
- Expert consultation on site
- Optimal and custom made solutions
- Stringent quality management
- Less administration

# Reciprocating Saber Saw Blades

**BeA Recipro saber saw blades are specifically used by pallet repair shops and for wooden packages. These long-lasting saber blades easily saw through timber and/or steel. BeA Recipro blades fit into all common saws.**

- Extremely durable Bi-Metal welded blades
- Universal feed
- Vario teething especially for nail embedded wood

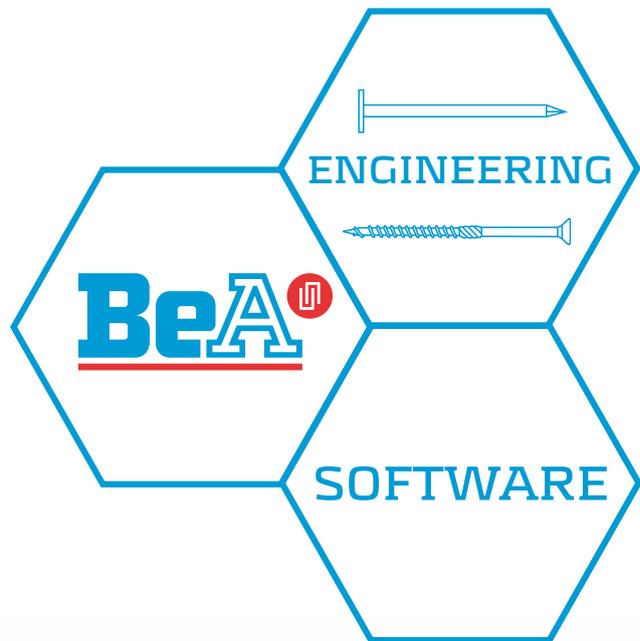

### Applications

Pallet repairs, nail embedded wood

# Calculation software as per Eurocode 5 for nails and screws

Download the range free of charge: <http://software.bea-group.com>

## BeA Engineering Software

### 4 calculation methods

#### Roof insulation with BeA nails

#### Roof insulation with BeA screws

#### Montage wood/wood with BeA nails

#### Montage wood/wood with BeA screws

### Key benefits

- Conforms to current industry standards
- Intuitive user interface
- Fast, manageable data capture
- Shows the entire range
- Detailed display of results
- Manageable, easy to understand evaluation
- Order quantities with article number
- Direct order option / email from the program
- Software can operate with a range of national standards/appendices (Switzerland, Austria, France etc.)
- Insulation panel manufacturers STEICO, PAVATEX by Soprema, Gutex, best wood SCHNEIDER with direct product selection
- Increased profitability
- Available in a range of languages
- Download the range free of charge: <http://software.bea-group.com>

### User friendly operation

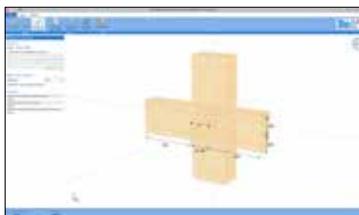

#### Design of elements

#### Quantification of loads

#### Optimisation of selection of fixings

#### Records and results certificates

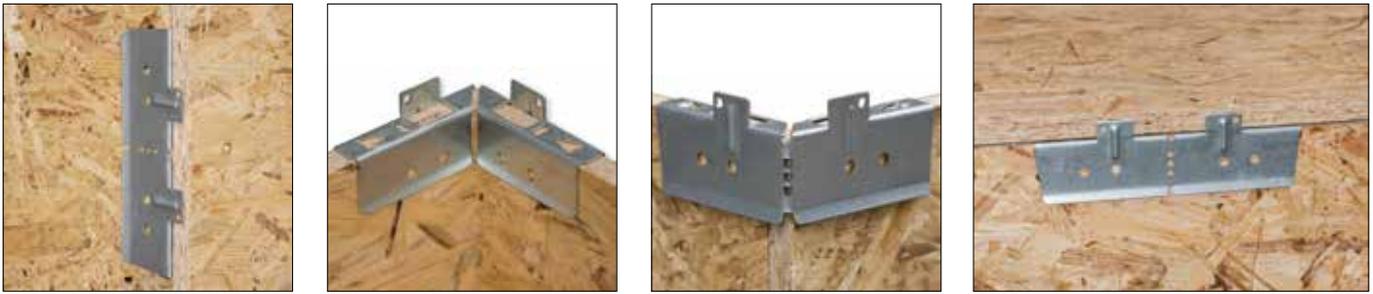

For making  
stable and sturdy  
packaging crates

# BeA VTI connectors

Simple, fast, stable, cost efficient, protected as utility model

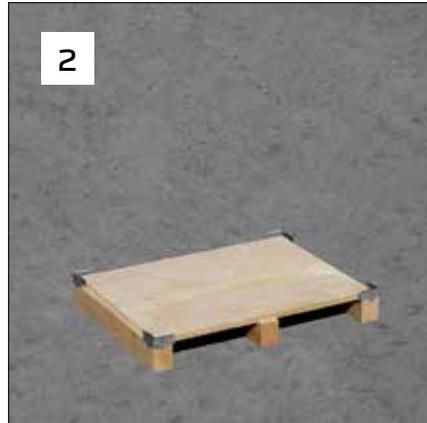

- World first for quick and easy crate assembly
- Only one component for long sides and corners
- Simple to use without tool
- Sturdy hot dip galvanised version, high load bearing capacity
- For 12 and 15 mm board materials e.g. OSB panels, plywood, chipboard, honeycomb core cardboard
- Protected as utility model
- Made in Germany
- The BEA VTT connector for making stable and sturdy packaging crates
- Use of low priced board material (e.g. OSB panels, plywood, chipboard, honeycomb core cardboard)
- Fast construction time (120 sec), significant cost and time saving
- Connectors can be used without the aid of a tool
- No milled, drilled or grooved profiles in the board parts
- Can be reused / mono material recycling

construction  
time  
(120 sec.)

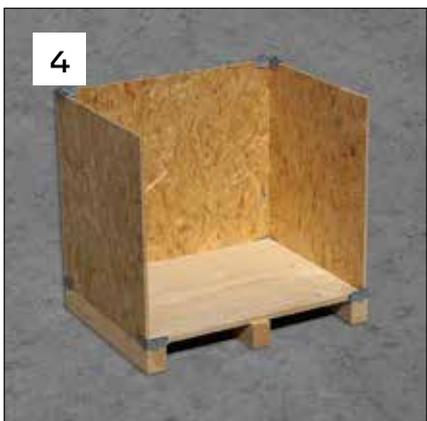

1  
BeA crate set with BeA VTT connectors

2  
Pallet as a basis with BeA VTT connectors

3  
Simple insertion of the crate sides

4  
The crate can be filled at any time

5  
Fit the BeA VTT connectors at the top

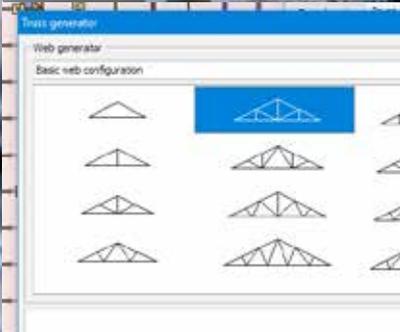

6  
Set the lid in place, seal using packaging strap

ARCTEC

Software solution for  
a statistical calculation of  
our nailplates

# BeA Nailplates

## BeA Nailplates

BeA nailplates with CE identifier are made from S280GD and optionally available with a Z275 galvanisation. Other features (e.g.: stainless steel) are also available, and can be applied on agreement.

- Versatile
- Optimal connections and materials utilisation
- High load bearing capacity
- Prevents splitting
- Various nail lengths and plate thicknesses applicable, recording to a statistical calculation

## Applications

Farm buildings, halls, workshops, consumer markets, administrative and office buildings, housing, formworks, roof refurbishment, building extensions, single and multi family housing, special construction and the reinforcement of all types of joints, packaging materials etc.

BeA supplies nailplates of 1mm, 1.5 mm and 2 mm thick sheetmetal in a huge range of measurements. Please contact us and ask for our nailplates information brochure: Tel. +49(0)4102-78 275 or [arctec@behrens-group.com](mailto:arctec@behrens-group.com)

### Nailplate Binder

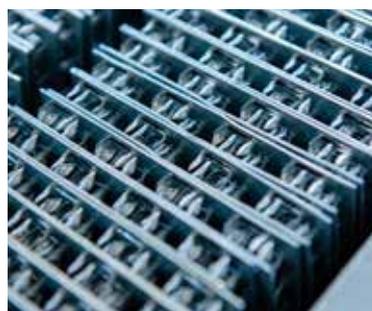

- Triangle binder
- Aisle truss binder
- Studio binder

### Packaging

- Crate reinforcement
- Longitudinal connector
- Pallet block reinforcement

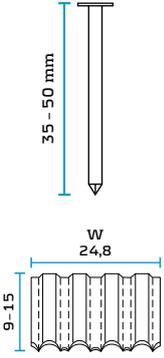

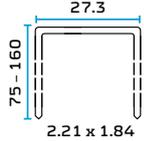

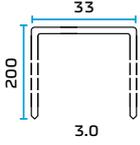

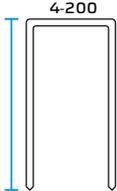

### Prevention of wood splitting during

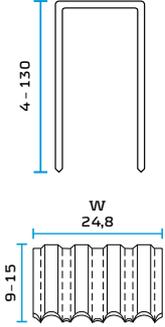

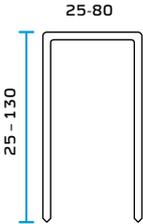

- Construction with tropical wood
- Thin wooden cross section

## BeA Nomenclature

### BeA Tool description

# 14/32 - 613

### Shank properties

### Material

- BK = Steel, bright
- NK = Steel, electro galvanized
- NK Hard = Steel, galvanized, hard
- NKS = Steel, galvanized, extra hard
- FV = steel, hot-dipped galvanized
- VZ = Steel, heavy electro-galvanized
- LM = Aluminium
- A2 = Stainless steel, comparable to material 1.4301
- A4 = Stainless steel, comparable to material 1.4401
- KU = Copper
- MS = Brass

### Surface properties

- HZ = Steel, resin coated to attain higher withdrawal values
- Ring = Ring Shank
- Screw = Screw Shank
- NG = Screw Nail

Standard: all BeA Staples, SK Brads and Pins are manufactured with chisel point, except type 346

Standard: all BeA BDC and Strip Nails are manufactured with diamond point

### Staple and nail points

- DP = Divergent point, staple legs divert sideways away from the crown
- IA = Inside chisel point: staple legs turn inwards
- AA = Outside chisel point: staple legs turn outwards
- CD = Rebated edge for gypsum fire board
- SS = Blunt point
- NI = Clinch point

### BeA certificates and classifications

BeA staple type 155 (38mm-65mm) in VZ HZ and NR HZ and BeA staple type 180 (40mm-80mm) in VZ HZ and NR HZ are in compliance with DIN 1052 part 2 and the general building inspection code.

All fasteners available from BeA that are used in building load bearing structures have the characteristics specified in Eurocode 5.

The complete required CE labels according to EN 14592 can be downloaded as pdf files here: <http://www.bea-group.com/ce>.

For the planning of structural framework according to EN 1995-1-1 you can take the necessary details from these documents.

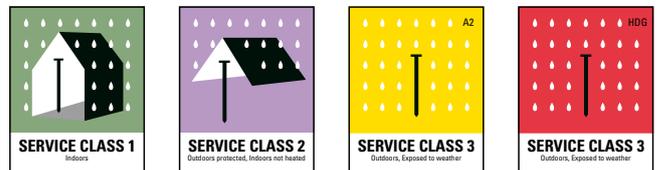

BeA is a partner of the European Pallet Association and is approved to manufacture EPAL dome head ring Nails.

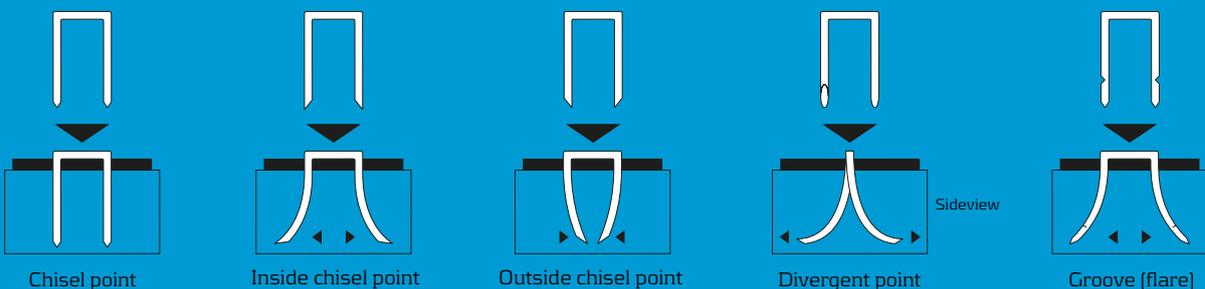

All BeA Pneumatic tools are in compliance with safety regulations as outlined in the EG machinery directive 2006/42/EG and are labelled with the CE mark.

\*box includes one PH2 Bit

# BeA BeFIX Screws and BeA

# BeFix double threaded screws for builders

Hardened, "blue" zinc plated, free of chrome VI, ETA approved

### BeFIX screws are "blue" zinc coated

- free of chrome VI
- higher corrosion resistance than ordinary coatings
- harder surface
- high resistance against wear and tear
- "blue" zinc coated and sealed surface
- approved to service class 1 and 2 according to EN 1995:2008

### BeFIX screws with aggressive grip-tip

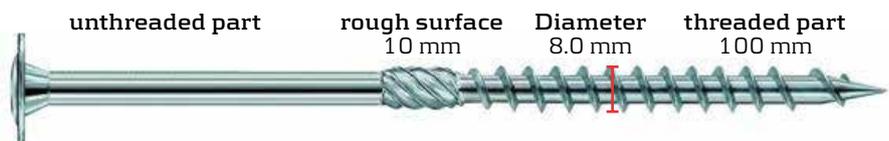

- fast screwing
- less screwing resistance
- ETA approval (European Technical Approval)

### BeFIX screws with proven TX-Bit

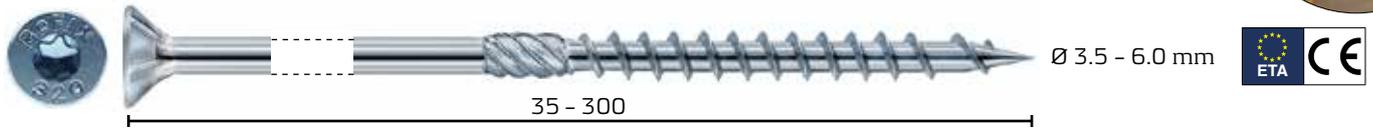

- the new conical bit tip fits precisely into the screw head
- the new bit-tip ensures an ideal, non slip traction

Screw dimensions, for example:  
BeFIX TK 8.0x300/100/10

Material: Galvanised steel type SWRCH35K meets JIS G 3507-1 (2005)  
 European Technical Assessment: ETA No.15/0842  
 Fire resistance: Class A1  
 Intended use: Uncracked concrete types C20/25 to C50/60.

- t<sub>fix</sub> = Max. thickness of item to be affixed
- L = Length of anchor shaft
- d<sub>o</sub> = Drill hole diameter
- h<sub>1</sub> = Min. depth of drill hole in member
- h<sub>nom</sub> = Min. effective depth
- h<sub>ef</sub> = Effective anchorage depth
- h<sub>min</sub> = Min. member thickness
- d<sub>f</sub> = Diameter of insertion hole
- S<sub>w</sub> = Wrench opening width
- T<sub>inst</sub> = Required tightening torque

## BeA Timber Connectors

	Description	Dimensions / Materials / Applications
	<p>Joist Hangers Legs inside and outside</p>	<ul style="list-style-type: none"> <li>- Available in different sizes</li> <li>- Galvanized Steel Plates</li> <li>- For fixing beams</li> </ul>
	<p>Angle Brackets</p>	<ul style="list-style-type: none"> <li>- Available in different sizes</li> <li>- Galvanized Steel Plates</li> <li>- For fixing trimmed joist to timber</li> </ul>

<sup>\*1)</sup> BS5350 H4

<sup>\*2)</sup> ASTM E28

<sup>\*3)</sup> BS 5350 H3

<sup>\*4)</sup> flexible up to -20 °C

<sup>\*5)</sup> ASTM D3236

Further hotmelts are available on request. Customers own tests are recommended.

Viscosity 180° cps <sup>*5</sup>	Characteristics	Typical Applications
2.000	relative short open time, good adhesion to many surfaces	Porous materials e.g. paper, wood, textile, foams, packaging
4.500	short open time, very high molten tack	Packaging
5000 <sup>*8</sup>	short open time, very high molten tack	Packaging
9.500	transparent, good adhesion to many surfaces, high viscosity and excellent gap filling, middle open time	General purpose adhesive (paper, wood, textile, foam)
20000 <sup>*8</sup>	transparent, good adhesion to many surfaces, high viscosity and excellent gap filling, middle open time	General purpose adhesive (paper, wood, textile, foam)
9.500	very short open time	Packaging
5.500	transparent, long open time, good adhesion to many surfaces	General purpose adhesive (textile, wood, plastics), excellent performance
5.500	transparent, long open time, good adhesion to many surfaces	General purpose adhesive (textile, wood, plastics as polyamide, polystrol etc. )
3.500	transparent, long open time, good adhesion to many surfaces	General purpose adhesive (textile, wood, plastics as polyamide, polystrol etc. )
6.800	forms a tough, but flexible bond, long open time, for general materials	General materials (metal, glass, plastics, ceramics, fibreglass, paper and board)
1.950	forms a tough, but flexible bond, long open time, for general materials	General materials (metal, glass, plastics, ceramics, fibreglass, paper and board)
5.000 <sup>*8</sup>	forms a tough, but flexible bond, long open time, for general materials	General materials (metal, glass, plastics, ceramics, fibreglass, paper and board)

Viscosity 180° cps <sup>*5</sup>	Characteristics	Typical Applications
3.200	Suitable for spraying and bead applications, excellent low temperature flexibility	Pallet stabilising, packaging
4.500	Formulated for spraying, long open time, good adhesion to many surfaces	Packaging foams, formed mouldings, upholstery foams, most plastics
4.000	Formulated for spraying, very long open time, good adhesion to many surfaces, tough shock resistant bond	Most plastics, foams, wood and cardboard
2.500	Formulated for spraying, very long open time, good adhesion to many surfaces, tough shock resistant bond	Wood, plastic and metal. Special developed for the concrete industry

<sup>\*6)</sup> following DIN 52011

<sup>\*7)</sup> WPS 68

<sup>\*8)</sup> following DIN 53211

## BeA Power Packages

BeA Power Package (K160 Kit) comprising:

Compressor K160-6

+

Spiral Hose

+

Blow Gun

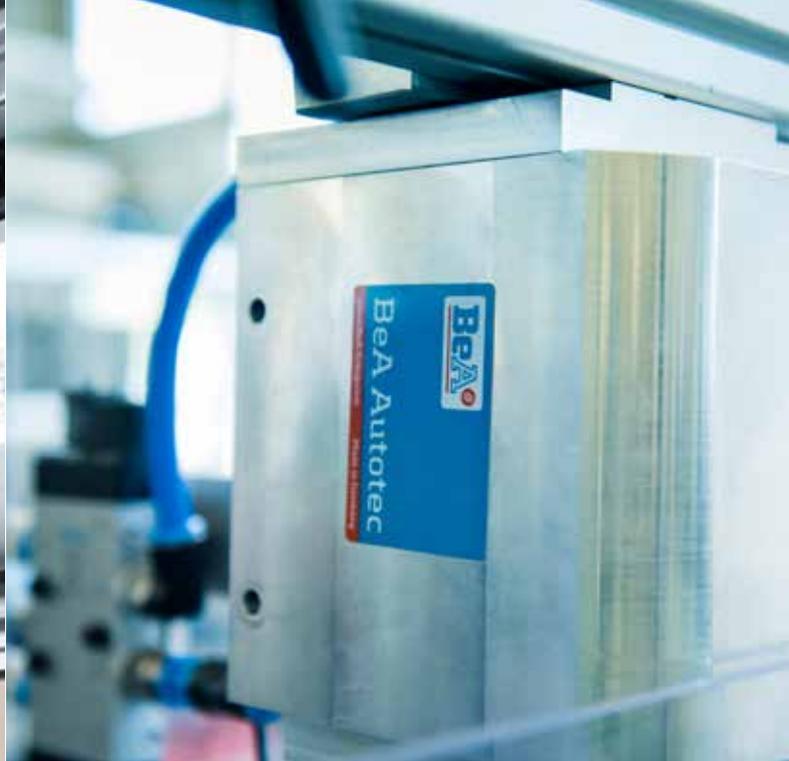

+

Stapler of your choice (see below)

Item No.	Description	Weight
12100493	KIT K160 with 380/16-420 (Tool description Page 29)	14 kg
12100495	KIT K160 with 380/16-429LN (Tool description Page 29)	14 kg
12100497	KIT K160 with 90/40-621 (Tool description Page 34)	14 kg
12100498	KIT K160 with KIT 229 (Tool description Page 49)	14 kg
12100499	KIT K160 with SKAM 350-226C (Tool description Page 54)	14 kg
12100491	KIT K160 with SKAM 450-227C (Tool description Page 55)	14 kg
12100500	KIT K160 with SKS 650-228 (Tool description Page 56)	14 kg

# BeA Autotec

The BeA Autotec system offers the following benefits:

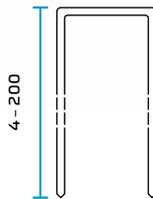

- Precision German manufactured equipment that guarantees performance reliability.
- Automated staple signal input, either 24V DC or pneumatic
- Individual energy adjustment of the stapler head to the specific application

- Wide array of accessories, including electronic placement and magazine control, edge guides, rollers, etc.
- Reduces your manufacturing costs through
  - Customized design
  - Installation into new or existing equipment
  - Availability of customized components and accessories for tool mounting and fastener application

**BeA Autotec tool - long magazine 235 / 245 / 265 / 285**  
Magazine capacity: 100 - 500 fasteners (approx.) leg lengths: 4 - 200 mm

- Placement and stapling possible in any position and orientation
- Various leg lengths can be loaded without further adjustments
- Electronic placement and magazine control
- High speed fastening - frequency up to 8 cycles per second
- Multiple mounting options facilitate installation

**Applications:**

*prefabricated houses, window and door frames, packaging, furniture, pallets and crates*

**ROUND HEAD NAILS**

Nails	Magazine capacity	Frequency/sec.	Air consumption
Ø 2.8 - 4.1 / 50 - 100 mm	120 Nails	max 4 - 5 /sec	3.5 - 4 Litre at 6 bar

**D-HEAD NAILS**

Nails	Magazine capacity	Frequency/sec.	Air consumption
Ø 2.9 - 3.4 / 50 - 100 mm	160 Nails	max 4 - 5 /sec	3.5 - 4 Litre at 6 bar

**BeA Autotec tool strip nailer**

Magazine capacity: up to 140 nails leg lengths: 50 - 100 mm

- Adjustable magazine capacity
- Electronic placement and magazine control
- Low maintenance
- Long operating life

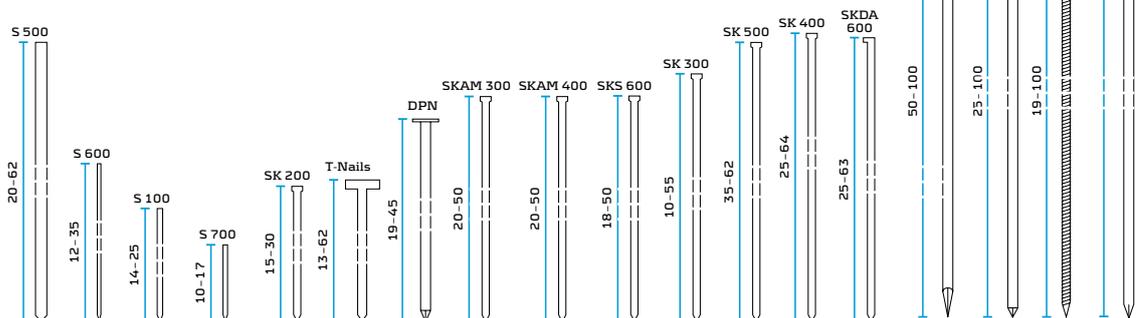

**Applications:**

*prefabricated houses, furniture frames, pallets and crates*

R20

**Overview of BeA fasteners:**

**New**

**BeA Autotec strip nailer 296 with reloading station 297**

for strip nails type R20 in lengths 130 - 160 mm Ø 3.8 - 5.0 mm

**BeA Autotec strip nailer 296**

- Magazine capacity of 2 nail strips
- Magazine control
- "Dry firing" control
- Multi directional nailing possible

**Reloading station 297 with automatic nail feeding**

- Reloading and feeding of the nails happens automatically using a cassette type holding bay for 90 nail strips (approx. 1.800 nails)
- Filling of the nail cassette (straight out of the carton) takes little time
- The loading station automatically corrects the position of the nail strip and feeds it correctly into the magazine of the nailer

**Applications:**

crating, heavy duty wooden packaging (pallets etc.) and prefabricated house industry

Description	Length in mm
R20 3.8 x 130 BK	130
R20 3.8 x 130 BK Screw	130
R20 3.8 x 130 BK Ring	130
R20 3.8 x 130 NK	130
R20 4.2 x 130 BK	130
R20 4.2 x 160 BK	160
R20 4.6 x 145 BK	145
R20 4.6 x 160 BK	160
R20 4.6 x 160 BK Screw	160
R20 4.6 x 160 NK	160

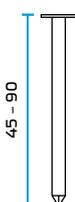

**BeA Autotec tool for jumbo coils**

Magazine capacity: up to 900 nails  
Plastic and Wire collated  
Nail lengths: 45 - 90 mm

- High magazine capacity
- Electronic placement and magazine control
- Accurate nail placement
- Low maintenance
- Long operating life

**Applications:**

prefabricated houses, furniture frames, pallets and crates

**BDC NAILS**

Nails	Magazine capacity	Frequency/sec.	Air consumption
Ø 2.5 - 3.4 / 45 - 90mm	1 jumbo coil / 750 - 900 Nails	max 4 - 5 /sec	2.5 - 4 Litre at 6 bar

**TC NAILS**

Nails	Magazine capacity	Frequency/sec.	Air consumption
Ø 2.5 - 3.1 / 45 - 90mm	1 jumbo coil / 750 - 900 Nails	max 4 - 5 /sec	2.5 - 4 Litre at 6 bar

### BeA Autotec tool side-loader 232 / 242 / 262 / 282

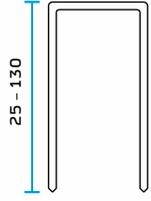

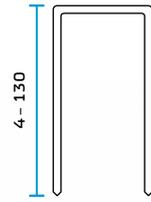

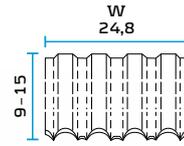

Magazine capacity: up to 5.000 fasteners

Leg lengths: 4 - 130 mm

- High magazine capacity
- Automatic reloading - avoid time intensive manual reloading
- Electronic placement and magazine control
- Frequency up to 8 cycles per second
- Multiple mounting options facilitate installation

**Applications:**

*prefabricated houses, furniture, packaging, pallets and crates*

- Increase of output
- Decrease of manufacturing costs
- Higher quality level
- High flexibility
- Increased productivity
- Reduced changeover times
- Low maintenance

### BeA Autotec tool with changeover cassette 264 / 284

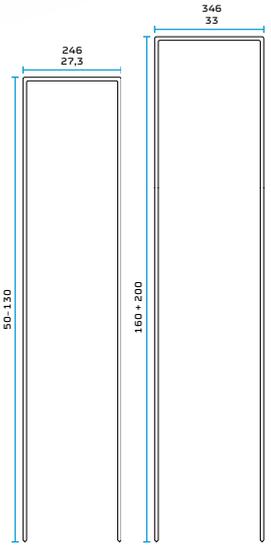

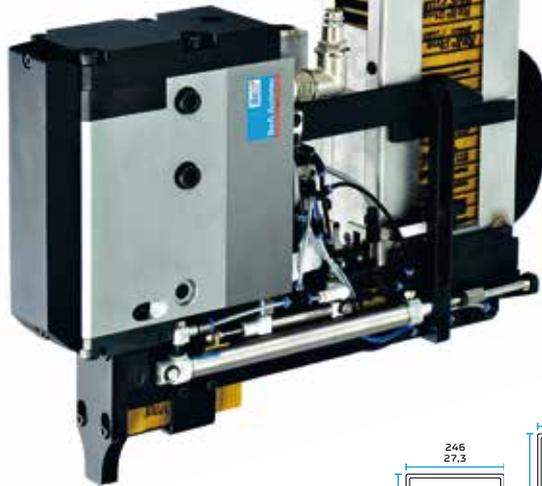

Magazine capacity: up to 2.300 staples

Leg lengths: 25 - 130 mm

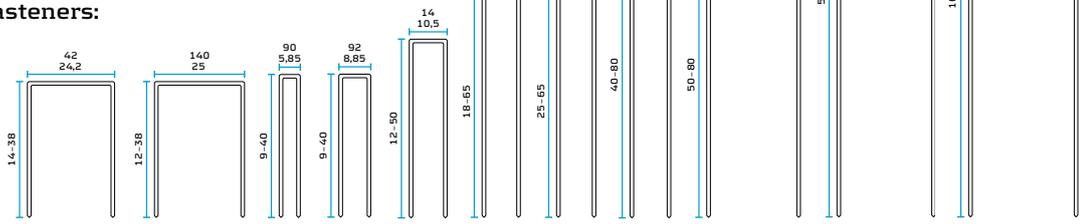

- Compact design
- High speed reloading
- Low maintenance
- Long operating life
- Frequency up to 10 cycles per second
- Electronic placement and magazine control

**Applications:**

*specifically designed for in plant house manufacturing*

**Overview of BeA fasteners:**

# BeA Automated Fastening Systems – highlights

- 1989 first BeA Autotec tool
- 1999 first BeA Autotec tool with changeover cassette
- 2003 first BeA Autotec tool for wide-crown staples
- 2014 first BeA Autotec tool for staples with a diameter of 3.0 mm
- 2015 first automatic reloading station for 20 degree strip nails used in a robotic Autotec strip nailer solution
- 2018 first BeA Autotec "Pusher" which allows an extremely precise adjustment of nail depth

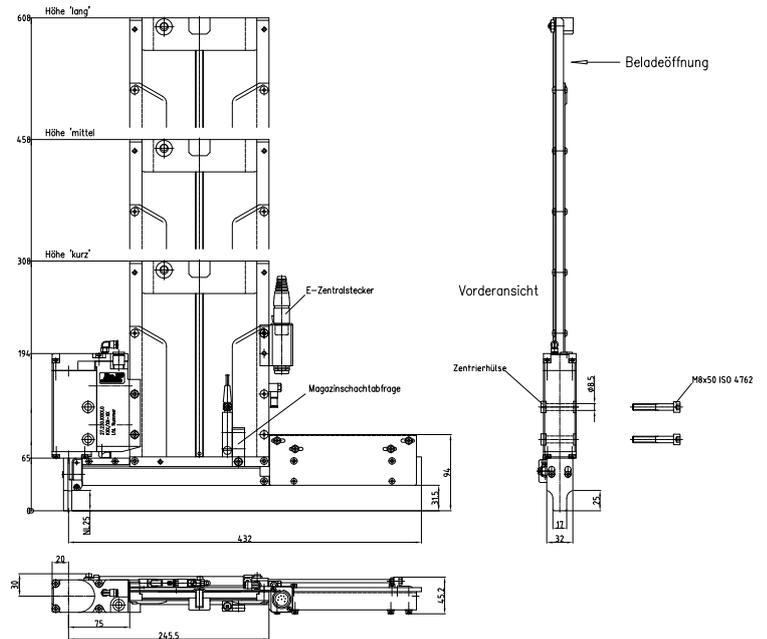

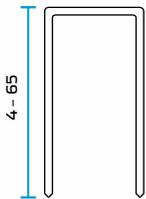

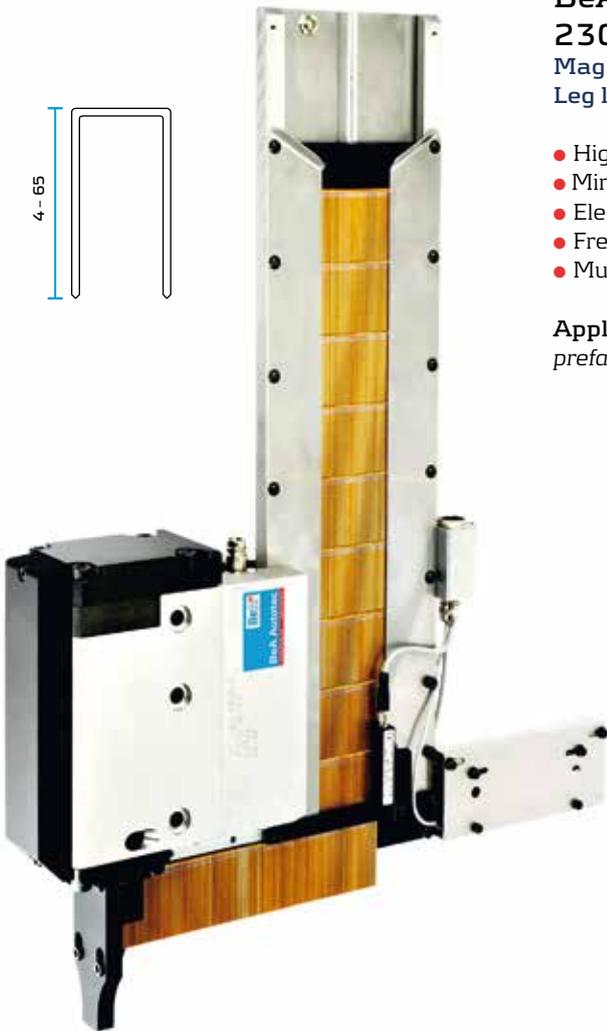

## BeA Autotec tool top-loader 230 / 240 / 260 / 280

Magazine capacity: up to 10.000 fasteners  
Leg lengths: 4 – 65 mm

- High magazine capacity
- Minimal reloading time
- Electronic placement and magazine control
- Frequency up to 8 cycles per second
- Multiple mounting options facilitate installation

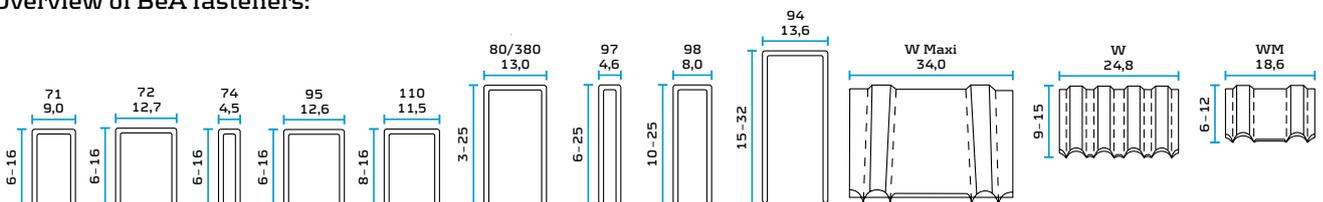

### Applications:

prefabricated houses, furniture, packaging, pallets and crates

BeA Automated Fastening Systems offer a comprehensive line of products, systems and solutions – customized to your manufacturing requirements. Popular applications include furniture, modular and prefabricated houses, packaging, wood to wood and automobile components.

### Overview of BeA fasteners:

## BeA Autotec Pusher for 0° TCIN-Nails

Ø 2.1 - 2.8

L: 35 - 50 mm

Head-Ø: max 6.2 mm

- Elevation adjustment up to 30 mm
- Pre-set penetration depth +/- 2 mm
- Optimal nailing performance
- Fast pushing technology, >2 nails/sec
- Noise reduction
- Jumbo coil magazine
- Nail guide ensures 90° nail position while pushing

### Applications::

Applications where flush nail drives are needed: Fire protection boards, plaster, gypsum boards and facades

### NAILS 0° TCIN

Nails	Magazine capacity	Frequency	Compression force
Ø 2.1 - 2.8 mm	1 Jumbo Coil	max 2 /sec	350 - 500 kg

## BeA Autotec 246/284 SL

For 246 Staples, L: 100 - 160 mm, Crown-Width: 27.3 mm

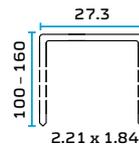

- Insulation and ETICS installation
- Fasten boards up to 130 mm
- Enhanced productivity and quality
- Up to 3 cycles per second
- Minimized change over and reload times with high capacity cassette magazine

### Applications::

Insulation fixing in timber frame fabrication wood fibre and polystyrol boards <130 mm

### STAPLES 246

Length	Magazine type	Frequency/Sec
100 - 160 mm	Cassette	max 3 /sec

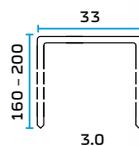

## BeA Autotec 346/284 SL for insulation fixing in automated panel and element production

- Insulation and ETICS installation
- Fasten boards up to 160 mm
- Enhanced productivity and quality
- Up to 2 cycles per second
- Minimized change over and reload times with high capacity cassette magazine

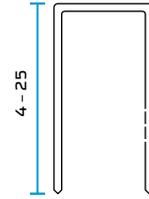

### Applications::

Insulation fixing in timber frame fabrication wood fibre <160 mm

### STAPLES 346

Length	Magazine type	Frequency/Sec
160 - 200 mm	Cassette	max 2 /sec

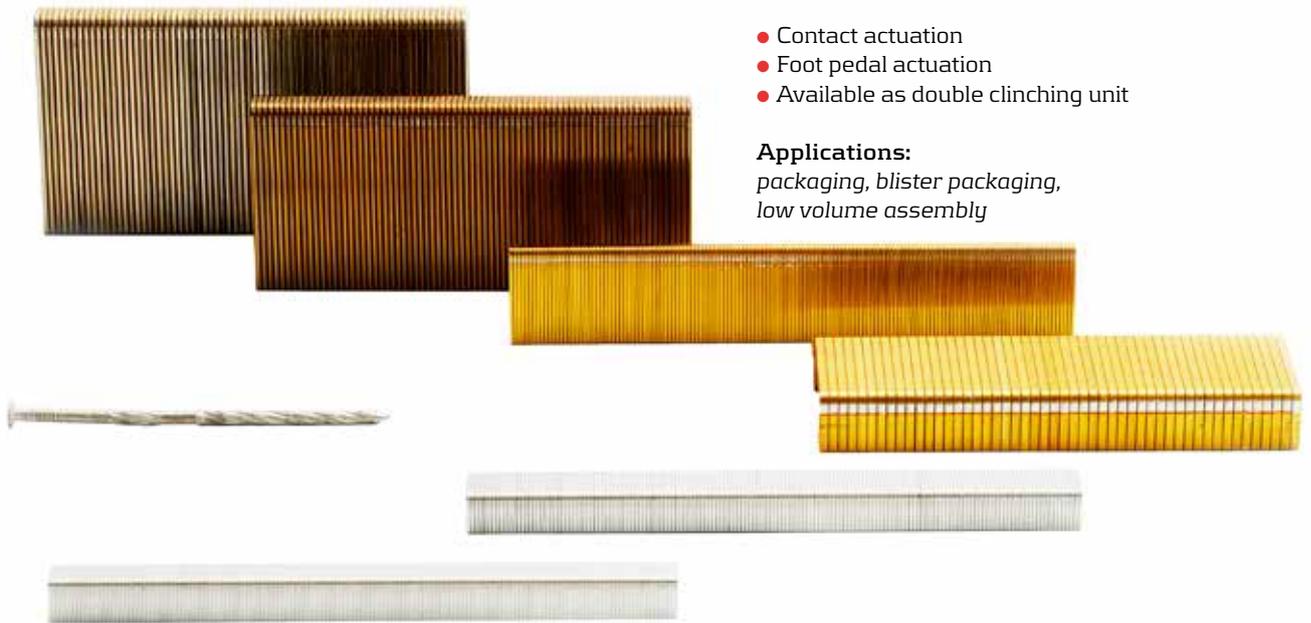

**BeA Autotec tool –  
Long magazine unit**

Magazine capacity: 300 – 500 staples  
Leg lengths: 4 – 25 mm

Stationary unit, available in automatic or foot-pedal actuation  
Hands free operation facilitates proper feeding and alignment

- Contact actuation
- Foot pedal actuation
- Available as double clinching unit

**Applications:**  
*packaging, blister packaging,  
low volume assembly*

**BeA Skater 800C for Coil Nails**

Magazine capacity up to 300 nails, type BDC,  
in lengths of 60 – 70 mm, Ø 2.5 – 3.1 mm

**BeA Skater 14/65-830C and BeA Skater  
180/65-835C for heavy duty staples**

Magazine capacity up to 152 Staples for  
fastener type 16/155/180 in lengths 40 – 65 mm

**BeA robot reloading system**

Magazine capacity up to 30.000 fasteners in lengths ranging from 8 - 65 mm

Please request additional information for specific fasteners.

## BeA robot nailer with reloading station

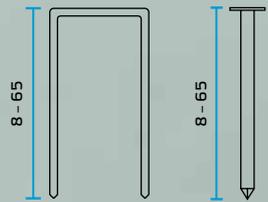

For staples and pins

Incorporates fully automated production processes by being mounted on either multi axis robots or X/Y/Z linear units.

- Small dimensions and low weight (4.5 lbs.) accommodate easy handling and high process speeds. The automatic reloading feature minimizes the tool's weight by carrying only the necessary amount of fasteners per cycle
- Placement and stapling possible in any position and orientation
- Very high capacity of the stationary reloading unit (up to 30.000)

**Applications:**

*Furniture industry, automotive, moulds for sand casting, specialty crate manufacturing*

**BeA Automated Fastening Systems - reaching beyond standard solutions**

# Magazine Selection for BeA Autotec

The selection of the magazine depends on:

- type and available space within the mounting system

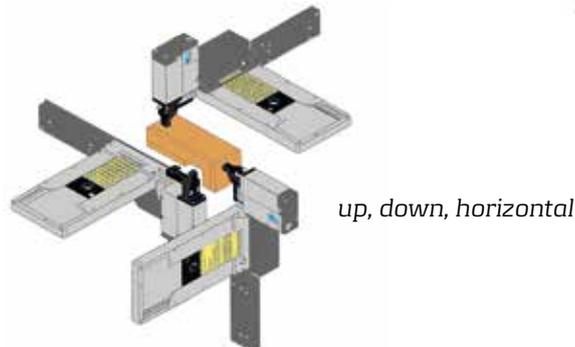

Stapling station integrated in production line

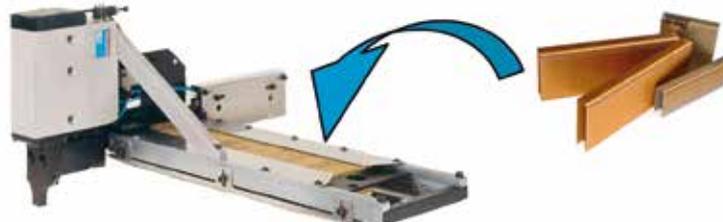

- type of magazine required

- stapling direction

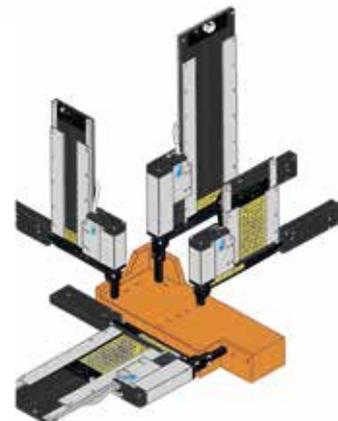

- available space for reloading

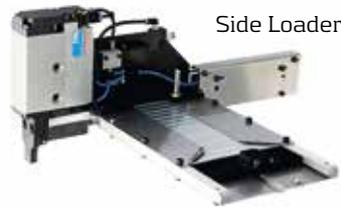

## Selection of nose length

The nose length depends on the height of the workpiece

# Magazine types

## BeA automatic fastening solutions for pallets and crates

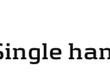

### BeA nailing tools and nailing units

- Automated machines for packing and much more
- CNC controlled machines
- Automation of assembly processes of crates, pallets and other wooden packaging
- Automation of assembly processes of pre-fabricated wooden crates, fences and garden furniture
- Extremely flexible due to supplemental tools, e.g. drillers, moulding cutter or saw

## General Terms and Conditions of Business

The following General Terms and Conditions of Business (T&Cs) of Joh. Friedrich Behrens AG (hereinafter referred to as the "**Supplier**") form part of the agreement by mutual consent; they take precedence over any deviating terms set by the buyer (hereinafter referred to as the "**Customer**" or "**Buyer**"). This shall also apply if the Supplier provides services which deviate from the General Terms and Conditions of the Customer.

### Terms and Conditions of Sale and Delivery

#### 1. Order placement

- 1.1 An agreement shall only enter into effect upon written confirmation by the Supplier or upon execution of an order. Changes, additions and subsidiary agreements to the contract must be made in writing. This shall also apply to this clause.
- 1.2 The Buyer is liable for the accuracy of all documents provided by him, in particular for any drawings, instructions and samples. The Buyer must notify the Supplier of any obvious defects by providing measurements and calculations in good time prior to implementing the order. The Supplier is not obliged to examine the item.
- 1.3 Samples will be provided at additional cost unless otherwise agreed.
- 1.4 Figures, drawings, images and service descriptions provided in brochures, catalogues, price lists or documents relating to the order are approximations in keeping with standard commercial practices.

#### 2. Performance period, impossibility, delay

- 2.1 The delivery dates specified by the Supplier shall be viewed as approximates unless a fixed delivery or performance date has specifically been agreed. A delivery date is considered as met if the goods are handed over to the Customer by the time agreed in Clause 5.2 or upon the Customer receiving notification that the goods are ready to ship.
- 2.2 In the event of subsequent amendments to the contract which could have an effect on the term of the contract, the latter shall be extended accordingly.
- 2.3 If the Supplier is unable to fulfil their obligation to deliver as a result of unforeseen, extraordinary events which, despite taking precautions reasonable for the circumstances in the specific case, are beyond their control - regardless of whether they occur at the Supplier's factory or at the premises of its subcontractors, in particular official interventions, operational disruptions, work disputes, delays to delivery of raw and auxiliary materials or force majeure - the delivery date shall be extended accordingly. If the execution of the contract is unreasonable for any of the parties due to the above-mentioned events, in particular if the execution of the contract is delayed substantially by more than 6 months, that party may request to withdraw from the contract.
- 2.4 If the Supplier does not receive the specific goods for fulfilling an order, or delivery of these is delayed or damaged, he is released from his obligation to supply the sold goods provided that he has taken the necessary steps to ensure timely self-delivery. The Supplier shall be responsible for immediately informing the Buyer in the event of non-availability and proceed with the prompt reimbursement of any services in return already provided.
- 2.5 If the Supplier is at fault for non-compliance with delivery dates or deadlines, the Customer may withdraw from the contract after fruitless expiry of a written, appropriate extension of the deadline. The Buyer may request compensation for damages in accordance with Section 12 of these T&Cs only. The same shall apply for other impossibilities of the Supplier.
- 2.6 In the event of impossibilities of the Supplier, the Buyer shall be obliged to reimburse the Supplier for any services carried out thus far based on the fair market value. The same shall apply if the Supplier is entitled to withdraw from the contract due to contractual or legal guidelines. Additional rights of the Supplier shall remain unaffected.

#### 3. Pricing

- 3.1 Unless otherwise agreed, all prices are understood to be ex-works and exclusive of packaging, shipping, postage and insurance. All prices are quoted exclusive of statutory sales tax.
- 3.2 If prices are not quoted or are to be at "current list prices", the list prices valid at the date of delivery will be charged. If the agreed price is not based on a list price but an agreement between the contractual parties, and the list price, market price or price for a subcontractor service has increased by more than 5% since the point of conclusion of the agreement, the Supplier can request that the agreed price be adjusted accordingly (exemption limit). This shall apply if a delivery term of more than four months is agreed or delivery takes place more than four months after conclusion of the contract for valid reasons outside of the Buyer's control. The preceding provision shall apply for price increases of up to 10%. For greater price adjustments, a new price agreement is required. If the aforementioned comparison price has increased by more than 25% and neither parties agree to a price increase, the Supplier is entitled to withdraw from the contract. The Customer shall have no further rights in this case.

#### 4. Payment terms

- 4.1 Payments are payable upon receipt of invoice and without deduction. Payments made to the Supplier's account within 8 days of receipt of invoice shall receive a 2% discount provided the Buyer is not in default in respect of payment for goods. The Supplier is entitled to send the Customer invoices electronically, i.e. via email.
- 4.2 Should the Supplier become aware after conclusion of the contract of a material adverse change on the part of the Buyer which may endanger his chances of claiming payment, up to the time of his delivery or providing the service agreed he may require the lodgement of a suitable guarantee within a reasonable period or provide his service step-by-step pursuant to Section 232 Para. 1 BGB. The Buyer can assign a qualified guarantor to act as security, to guarantee any claims as a primary liability and who is available for immediate consultation. If the Buyer does not satisfy the Supplier's justifiable demand or does not do so within a reasonable time, the Supplier may terminate the contract. In the event of termination of the contract, the Supplier shall be reimbursed for any preliminary work at the fair market value.
- 4.3 If the Buyer does not make payment in time, despite warning, the Supplier is entitled to discontinue all orders placed by the Buyer in addition to claim to performance and/or other legal or contractual rights.

#### 5. Shipping and transfer of risk

- 5.1 Shipping takes place ex-works. Unless otherwise agreed, the Supplier is not obliged to choose the cheapest shipping option.
- 5.2 Risk shall be transferred to the Customer once the goods have been received by the ordering party. If goods are ready to ship and shipment or space allocation are delayed for reasons outside of the Supplier's control, the risk shall pass to the Buyer upon receipt of notification of readiness for dispatch.

#### 6. Industrial property rights

- 6.1 Any images, drawings and other documents shall remain the property of the Supplier and subject to copyright law; they may not be made available to third parties without the Supplier's consent and must be returned immediately upon request.
- 6.2 If the production of goods based on drawings, samples or other information from Buyer violates the intellectual property rights of third parties, then the Buyer is obligated to release the Supplier from all claims or to compensate him for the damage that he claims to have suffered.

#### 7. Retention of title

- 7.1 The Supplier reserves the title to the delivered goods until all claims have been settled with the Buyer (reserved goods). In the case of payment by means of cheque or bill of exchange, title to the goods is retained until the bill is cleared by the Customer. Cheques will only be accepted on condition of fulfilment and not instead of performance. In the case of current accounts, the retention of title will serve to balance the Supplier's claims. The Buyer is obliged to appropriately insure the reserved goods, at their own expense, against all common risks, particularly fire and theft, and submit proof upon request.
- 7.2 Acquisition of ownership by the Buyer pursuant to Section 950 BGB is not permitted. A potential connection, mixing, filling or manufacturing and processing of the reserved goods with other goods not belonging to the Supplier may take place in the knowledge that the Supplier shall acquire joint property rights of the new item whereby the invoice value of the reserved goods shall correspond to the overall sales value of the new item. The new item shall therefore be considered as reserved goods for the purpose of these conditions and will be stored by the Buyer for the Supplier. Should the Buyer acquire sole ownership of the new item, he shall transfer the co-ownership share to the Supplier in respect of the value of the processed reserved goods.
- 7.3 The Buyer may only sell the reserved goods in the normal course of business and provided he is not in default. The Buyer shall now assign all claims to the Supplier arising as a result of resale to third parties. This assignment occurs only on account of performance. This assignment extends to all future existing claims concerning resale of the reserved goods. If the reserved goods to which we have title are sold by the Buyer together with other goods not delivered or in a processed state by the Supplier, then the receivables ceded to us from the resale will not exceed the invoice value for the reserved goods. In the event of resale of new items of which the Supplier has acquired joint ownership, then the receivables ceded to us shall be the value of the co-ownership share. The assigned claims will serve as security to the Supplier's claims to the same extent as the reserved goods.
- 7.4 The Buyer himself may collect the assigned claims provided he has complied with the payment terms of the business relationship, is not in default and is not subject to insolvency proceedings.

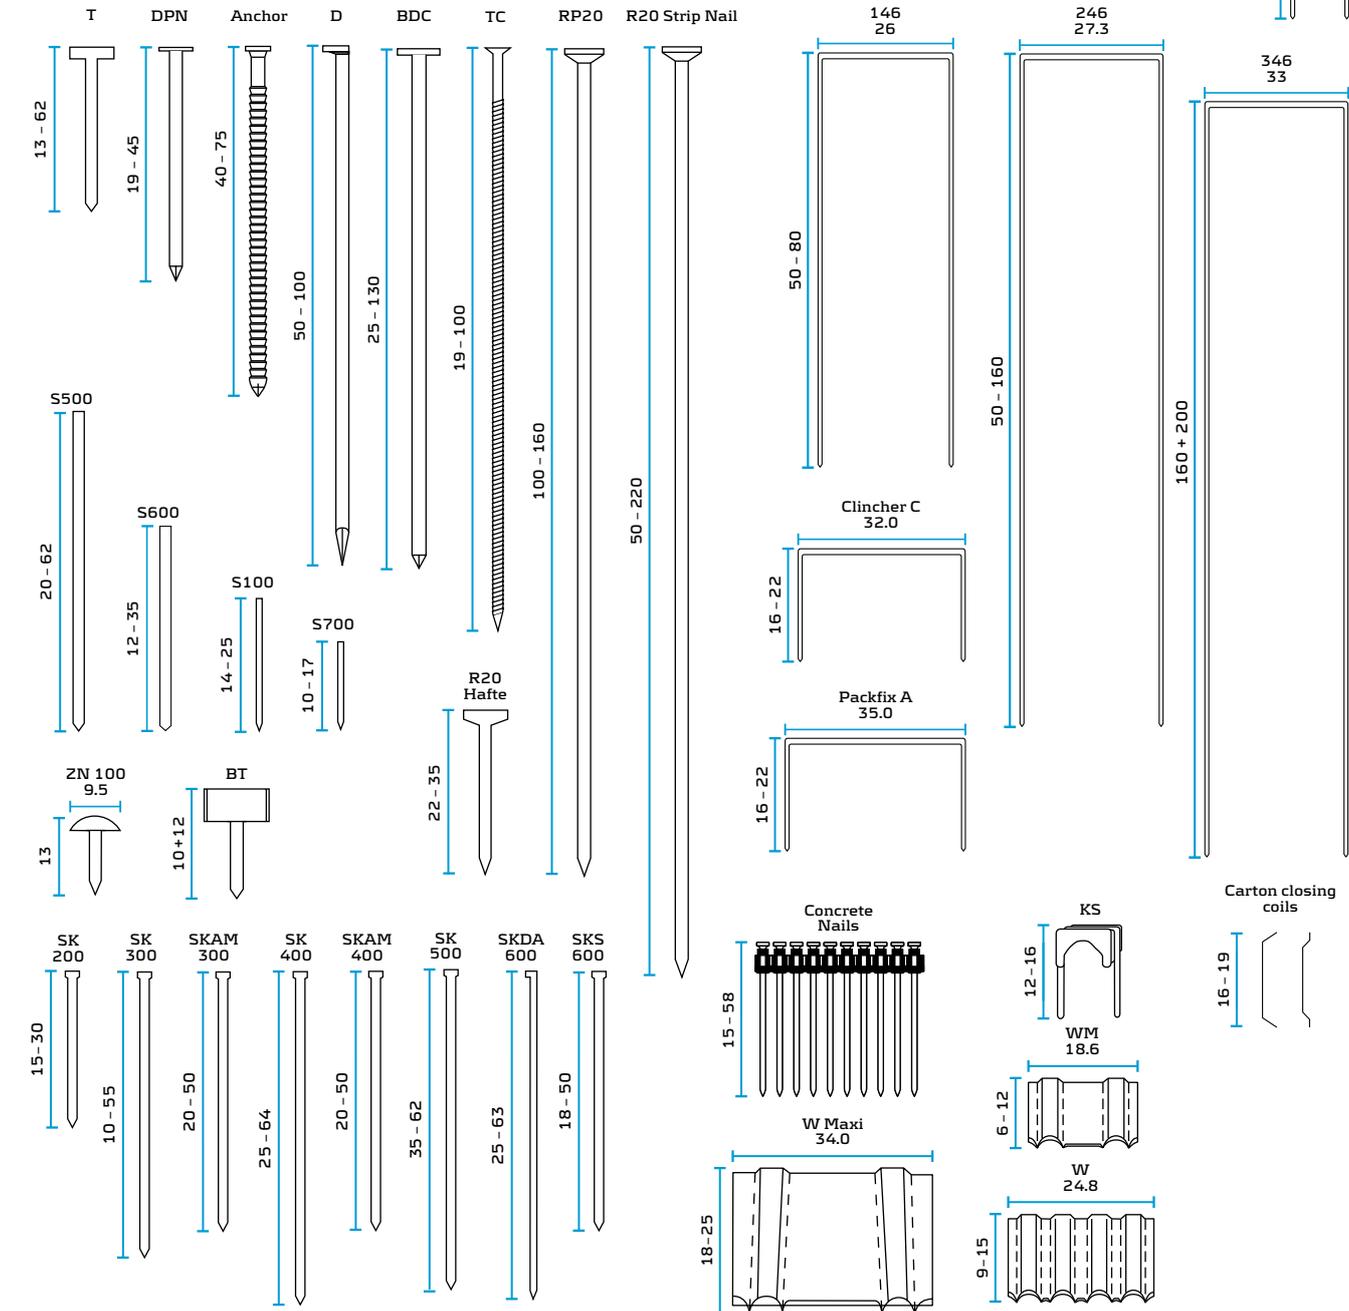

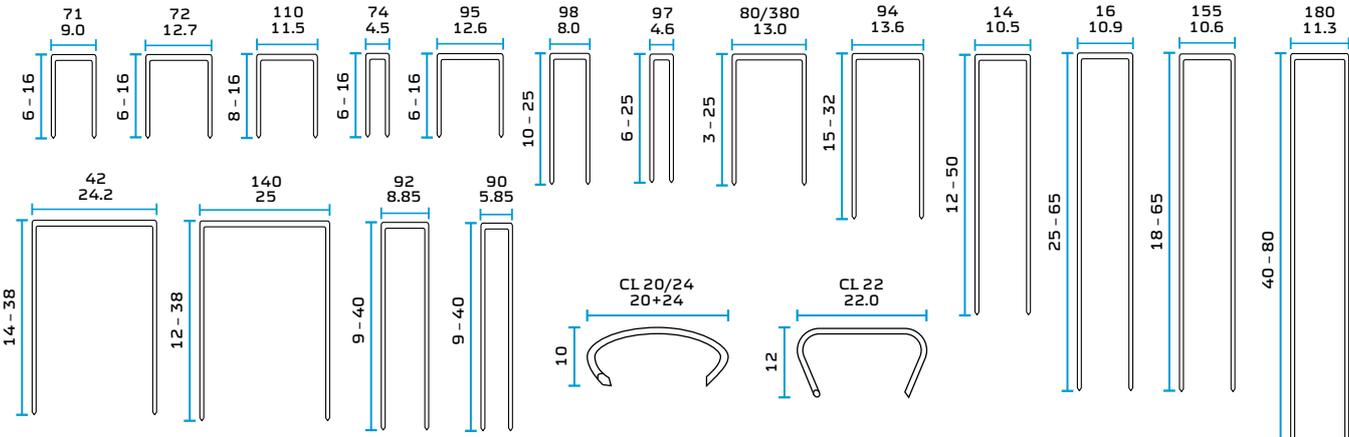

## General Terms and Conditions of Business

- 7.5 Should the Buyer not fulfil their contractual obligations, particularly with regard to delayed payment, the Supplier is entitled to demand temporary return of the reserved goods at the Buyer's expense and without exercising the right of withdrawal or setting a grace period.
- 7.6 In cases where third parties access the reserved goods or claims and securities of the Supplier, particularly in the event of pledging or other enforcement measures, the Buyer must indicate the Supplier's ownership and immediately notify the Supplier and provide the documents necessary for an intervention; this shall also apply to impairment of any other kind. The Buyer shall reimburse the Supplier for the costs of resisting such seizures and claims.
- 7.7 The Supplier is obliged to release at his own discretion any securities that he is entitled to in accordance with the above provisions to the extent that the realisable value of such securities exceeds the receivables to be secured by more than 10 percent.
- 8. Moulds and tools**
- 8.1 The costs for moulds or tools to be prepared will be invoiced pro rata and separately from the cost of the goods
- 8.2 Through remuneration of shares of costs for moulds/tools, the Buyer shall not acquire any rights to these; the moulds/tools shall remain the sole property of the Supplier. The Supplier is obliged to store the moulds/tools on the Buyer's behalf for a duration of one year from the final delivery. Should the Buyer provide notification before expiry of this deadline that they intend to place orders within this additional year, the storage period shall be extended further by one year.
- 8.3 Once this period has expired, the Supplier has free access to the moulds/tools. The Buyer may however acquire the moulds/tools by payment of the full costs.
- 9. Warranty**
- 9.1 If the goods delivered are faulty, the Supplier may then choose to either fulfil the order by remedying the defect or supplying a new product. He is obliged to bear the costs for all expenses, particularly transportation, tolls and material costs, required to remedy the defect as far as these costs are not increased by moving the delivery to a place other than the place of performance unless this complies with the use under the provisions of this contract.
- 9.2 If subsequent performance is not effected within a suitable period of time, i.e. a minimum of 2 weeks, or if the second attempt fails as well, the Buyer is entitled to choose between a reduction in the sale price or withdrawal from the contract.
- 9.3 The warranty obligation shall not apply if the Buyer does not use original parts or fixings and replacement parts approved by the Supplier with regards to the use of staplers and pneumatic nailers. The same shall apply to damages arising as a result of chemical influences on fixings used insofar as these are not foreseeable in the contract.
- 9.4 For defects caused by inappropriate or incorrect use, natural wear-and-tear, improper assembly or operation by the recipient or third party, or by incorrect or negligent treatment, warranty shall also not apply nor for the consequences of incorrect changes by the Buyer or third parties or those carried out without the Supplier's authorisation.
- 9.5 See Section 12 for claims for compensation of damages. Clause 12.5 shall apply for the limitation period of warranty claims.
- 10. Examination and notification obligation**
- 10.1 The Buyer is obliged to inspect the goods immediately upon delivery, and no later than immediately after unloading from the means of transport. Any defects, incorrect deliveries or missing items must be reported immediately. This notification must be made in writing. If the goods are being sent on further by the Buyer, inspection must take place at the initial place of delivery regardless. If own know-how is not sufficient, then an expert must be consulted immediately.
- 10.2 The notification period for non-conforming goods shall be two weeks from the date of delivery or release at the agreed location for defects which are detected in the course of proper inspection, and two weeks from the point of detection for defects that were not immediately apparent (hidden defects).
- 10.3 The Buyer must allow the Supplier sufficient opportunity to satisfy itself of the defect and notify them of the place where the goods are located and provide access to the goods. If this obligation is violated or the goods have been further processed, sent on or modified, these goods shall be considered approved. In the event of hidden defects, the Buyer shall bear the burden of proof that the goods were in a defective condition at the time of delivery.
- 10.4 Goods shall be considered approved if violation of obligation occurs pursuant to 11.1 to 11.3, and in the event of incorrect or non-timely notification of such defects that could have been detected upon proper inspection. Section 377 HGB shall apply unless otherwise stipulated in these T&Cs.
- 11. Compensation for breaches of duty**
- 11.1 The Supplier is liable without limitation in accordance with legal guidelines for damages occurring as a result of wilful intent or gross negligence. Excluded hereto is contractual violation due to gross negligence by simple vicarious agents, whereby liability shall be limited to predictable and typically occurring damage.
- 11.2 The Supplier shall be liable for damages from simple negligence if this breaches a material contractual obligation. Material contractual obligations are particularly those which are required in order to achieve the purpose of the contract and on which the customer may rely. In this instance, liability is limited to predictable and typically occurring damage. This liability is limited to a maximum amount of 2500 euros. This maximum liability amount shall also apply once more in the event of multiple breaches of duty (maximum overall amount).
- 11.3 Pursuant to legal guidelines, the Supplier shall be liable without limitation for damages to loss of life, bodily injury or damage to the health of a person. The Supplier's mandatory liability pursuant to product liability law shall also remain unaffected. Limitations of liability pursuant to Clauses 12.1 and 12.2 shall not apply.
- 11.4 Unless otherwise stipulated, compensation claims of the Buyer shall be excluded. The provisions in this clause shall also apply to non-contractual claims for damages as well as in favour of employees and other vicarious agents of the Supplier.
- 11.5 Excluded herewith are cases in which the Supplier is liable without limitation pursuant to the provisions in Section 12, whereby all warranty claims shall become statute-barred within one year as of the start of the statutory limitation period. This shall also apply for subsequent claims for defects. The statute of limitations in the event of a delivery recourse according to §§ 478, 479 BGB remain unaffected. This lasts for 2 years.
- 12. Applicable law, place of delivery, court of jurisdiction**
- 12.1 German law shall apply for all legal obligations and their implementation as well as any claims which may arise under exclusion of the UN Convention on the International Sale of Goods.
- 12.2 The place of fulfilment for all legal obligations is Joh. Friedrich Behrens AG.
- 12.3 The place of jurisdiction for any disputes arising from this contract is Hamburg. The Supplier is entitled to resolve disputes at the court of his registered offices.
- 13. Effectiveness in the event of partial invalidity, offsetting**
- 13.1 Should individual provisions of these contractual conditions be or become invalid, this shall not affect the validity of the other provisions. This ineffective provision shall be replaced by one which most closely resembles the originally intended purpose of the ineffective provision.
- 13.2 With regards to claims by the Supplier, the Buyer is not entitled to make deductions to payment of the purchase price or other claims or connection with the contract or exercise a right of retention unless this claim is known, undisputed or legally recognised. He is only authorised to effect a lien only, as far as his counterclaim is based on the same contractual relationship.
- 14. Special conditions for repairs**
- Repairs which do not come under the warranty in Section 10 are subject to the following conditions in addition to Section I. Insofar as the following provisions deviate from those stipulated in Section I, the following provisions apply.
- 15. Costs for non-executed orders**
- If a repair cannot be performed because the fault cannot be determined under observation of proper engineering standards or the order was withdrawn during implementation, the Buyer shall receive an invoice for any costs incurred.
- 16. Remuneration of a cost estimate**
- If a cost estimate is provided at the Buyer's request, they must remunerate any time-related costs which arise.
- 17. Extended lien on movable items**
- 17.1 The Supplier shall be entitled to a contractual right of lien on the Customer's item in its possession. The right of lien may also be claimed on account of claims arising from earlier work, replacement part deliveries or other services insofar as they relate to the item. For other claims arising from the business relationship, the right of lien is only valid insofar as these are undisputed or legally binding.
- 17.2 If the item is not collected within 4 weeks from the date of the collection request, the Supplier may charge a storage fee upon expiry of this period. If no collection is made after 3 months from the date of the collection request, the Supplier is no longer obliged to store the item and is not liable for minor negligent damage or destruction. The Buyer must be sent a due notice one month prior to expiry of this period. The Supplier is entitled to sell the item at market value upon expiry of this period in order to cover costs. The Buyer shall reimburse any loss in value.
- 18. Retention of title**
- 18.1 Unless spare parts etc. assembled within the scope of repair work become integral parts, the Supplier retains title to any assembled parts until all its claims from the existing contract have been settled.
- 18.2 Should the Buyer be in default, the Supplier may demand that the Buyer return the item to disassemble the built-in parts. The Buyer shall bear the costs of return and disassembly.
- 18.3 Should the Buyer conduct the repair, they must give the Supplier the opportunity to disassemble the item at the Buyer's premises. Labour and toll costs incurred shall be borne by the Buyer.
